Profile

Technical Skills

- Web development using PHP, Perl, JQuery, XSLT and standards-compliant, accessible HTML/CSS.
- Plugin and theme development using WordPress with PHP and MySQL.
- Database development in Windows and Linux using MS SQL, MySQL and Oracle.
- Application development in Windows using Delphi.
- Application development in Linux using various languages and tools.
- Continuous experience in the web development life-cycle, including user training.
- Continuous experience in the system development life-cycle, from idea to distribution.
- Continuous experience in tutoring non-technical computer users.
- Continuous experience supporting, upgrading and repairing consumer Windows systems.
- Strong emphasis on user-friendly interfaces and reliability.
- Strong emphasis on web standards and accessibility.
- Demonstrated aptitude for quickly learning and applying new languages and systems.

Non-Technical Skills

- Excellent oral and written communication skills.
- Excellent communication with computer experts and non-technical users.
- Good knowledge of the principles of accountancy and financial reporting, based on experience with application development in that area.

Primary Interests

- Standards-compliant web development, producing websites that remain accessible regardless of browser technology, internet connection speed or user disability.
- WordPress plugin and theme development and customisation.
- IT support and training for normal, non-technical computer users.
